		Micah-Paul Young Examiner Art Unit: 1615

Continuation of 5. does NOT place the application in condition for allowance because: the claims remain obviated by the prior art. Applicant argues that the paper of Nichols would create a non-rigid TTS, yet the rigidity of the TTS has not been claims in the instant application. The claims merely recite that the supprot material consists of paper. Applicant qualifies this limitation in the specification by disclosing the advantages of absorbant paper as a support medium. Nichols discloses a TTS with a support medium of absorbant paper. The fact that Hoffman does not disclose the presene of paper is irreleavent since Hoffman is the reference being modified. If applicant would like to claim the rigidity of the TTS along with other more defining features of the papr support material, applicant is more than welcome. These limitations of course should find support in the specification, and might require a further search.
